To Whom It May Concern,

I would like to comment on what a pleasure it has been to be doing business with Campana Technology of Baxley Ga.

I have been in the cabinet refacing business since 1971. I started my business by making flat doors of laminate in my own garage. As the business grew I promised myself that I would make the very best product and workmanship possible. When the time came to purchase cabinet doors, I looked for a manufacturer that had the same idea about quality and reputation of their company.

I have worked with many other door companies in the past. Ordering their doors and at first it went well , then delivery dates were not kept and if something was wrong with the product, they would not stand behind their workmanship and replace damaged doors if necessary. I sell an installed cabinet refacing program to over 26 dealers currently. A big really BIG box store is one of them.

Jim Campana and his family run company Campana Technology is the only company that has stood behind their product. They have replaced a door that has delaminated from a job as far back as 2002 without a question. If you have any doubt, I suggest you contact me at 330 562 4666 or e mail me at rcvor@netscape.net and I will be more than happy to give you the name of the companies that don't stand behind their product.

I have had the opportunity to do business with a company that's goal is the same as my company which is always do the job as if it was for your own mother. Campana Technology treats every customer that way.

Respectfully,

Joseph R Latina, President
